Intro

Eden Solutions was started in **2015** with the goal of becoming a recognized Indian IT company.

Using our tech expertise and cross-industry experience, we connect the processes, problems and complex ideas with technology. Our ultimate goal is to create lasting value throughout the entire digital transformation journey.

We have expertise in these Technologies:

CMS: <ul style="list-style-type: none">• WordPress• Webflow• Shopify• Ghost• Wix• Shopify	Frontend: <ul style="list-style-type: none">• React JS, Next JS, Gatsby JS• HTML5/CSS3/SCSS• Javascript/TypeScript• JQuery• Bootstrap• Tailwind	Backend: <ul style="list-style-type: none">• Node JS• Express JS• PHP• Codeigniter	Databases: <ul style="list-style-type: none">• MySQL• SQLite• MongoDB• PostgreSQL• Firebase• IndexDB	Clouds/Servers: <ul style="list-style-type: none">• Google Cloud Platform (GCP)• Amazon Web Services (AWS)• Microsoft Azure

Services we offer:

Custom Software Development:

Our experts take care of design, development, and consultancy to develop bespoke software solutions for businesses around the world.

MVP (Minimum Viable Product) Development

We make sure you get your MVP right from the start, and iterate based on the user response, with the right consultation we guide you when to pivot.

Staff Augmentation:

We provide curated, highly skilled talent for your projects, who seamlessly integrate into your existing team so it feels like you're working with a partner, not a vendor.

Full Service Web Design & Development

We are making secure, stable, and scalable web applications, portals and solutions that your customers will love, from last 6 years.

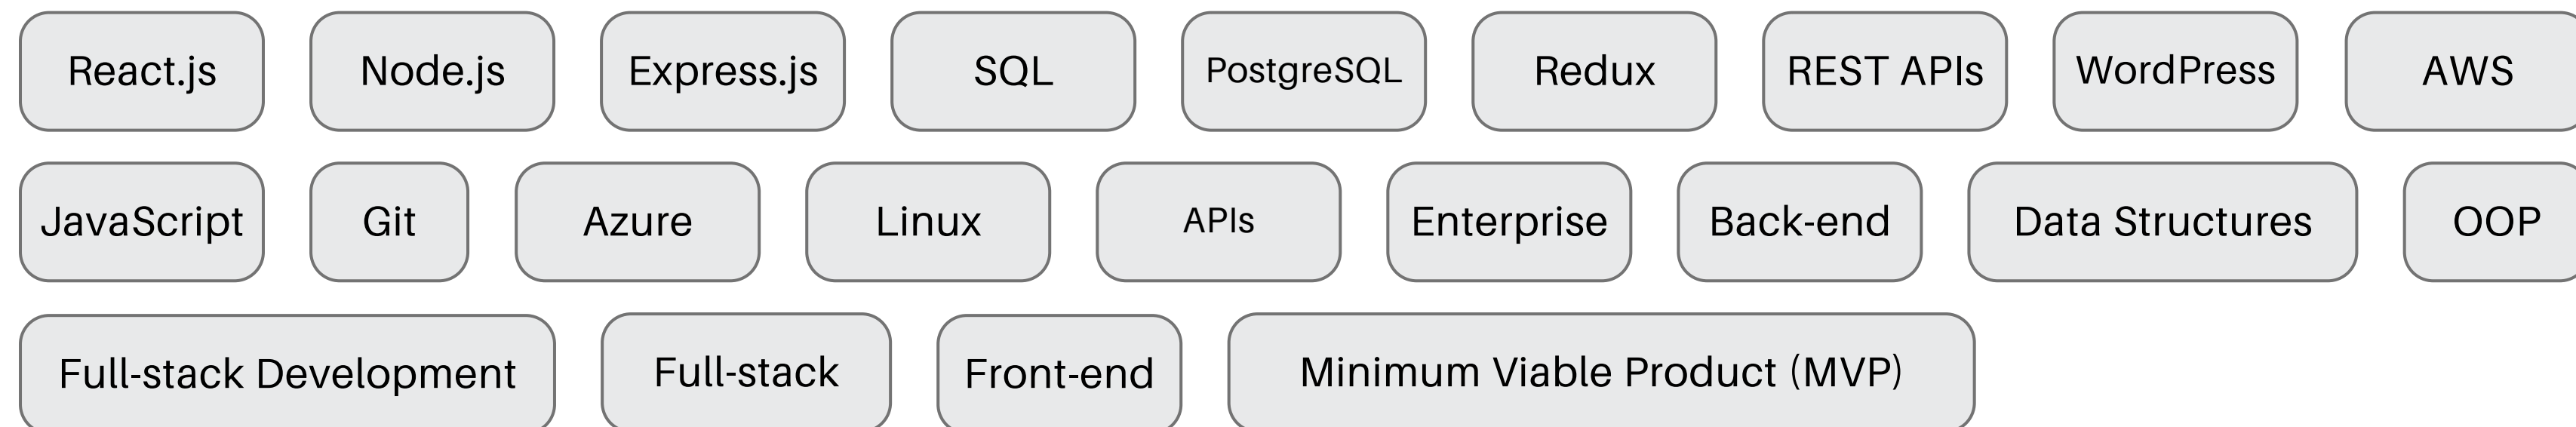

Our Clients

Tech Mahindra (Datamime)

Integrated an open-source computer vision annotation tool (CVAT) application into a software product using an inline frame and enabled cross-origin communication between the inline frame and the parent window. Updated the open-source CVAT application's user interface to match the software product theme. Customized the open-source CVAT by creating additional rectangular annotation tools.

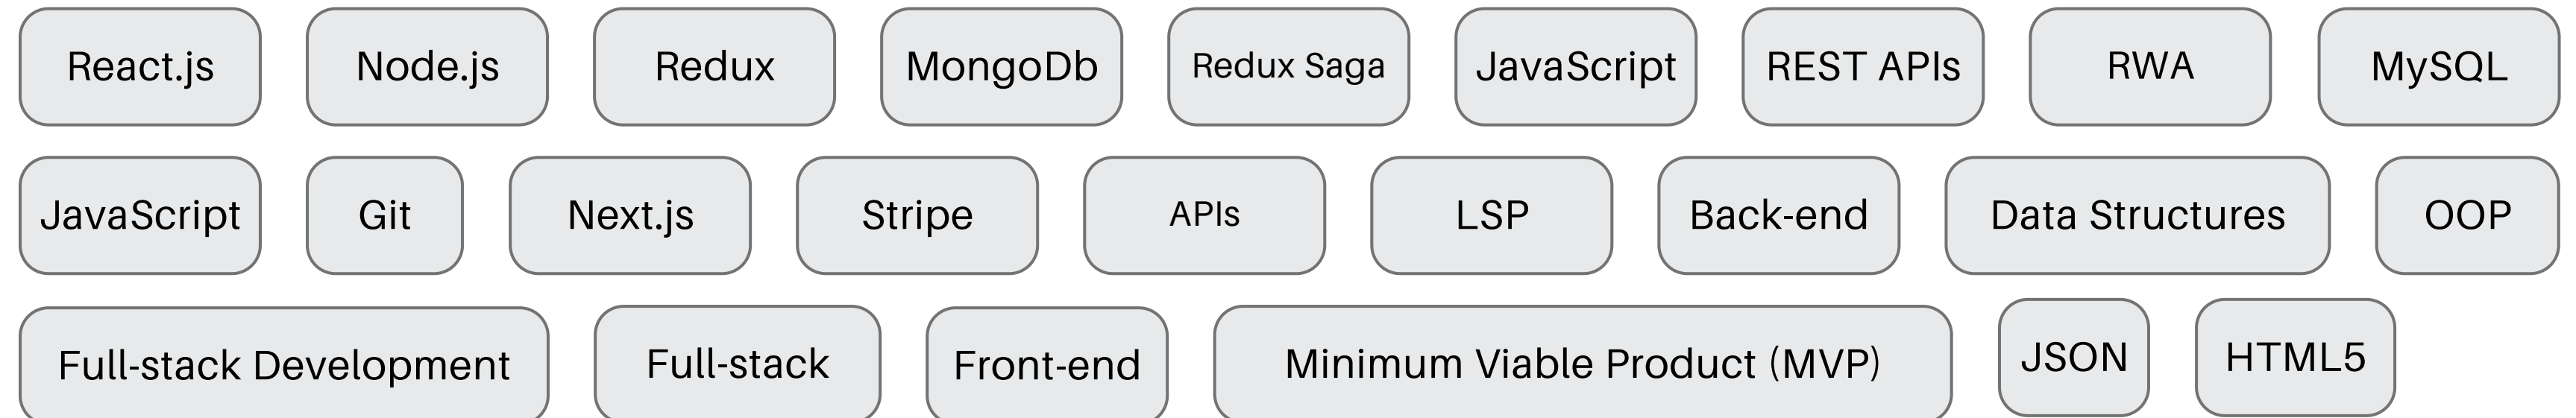

Skills & Tech-stack Used

We have built Nimmio from scratch, an eCommerce platform with all the standard features and advanced search, sort, and filter features to make searching easy. I also connected the client's Zoho CRM for invoice generation and automatic transaction capturing to reduce the manual accountant work and integrated Razorpay and PayPal for payment processing.

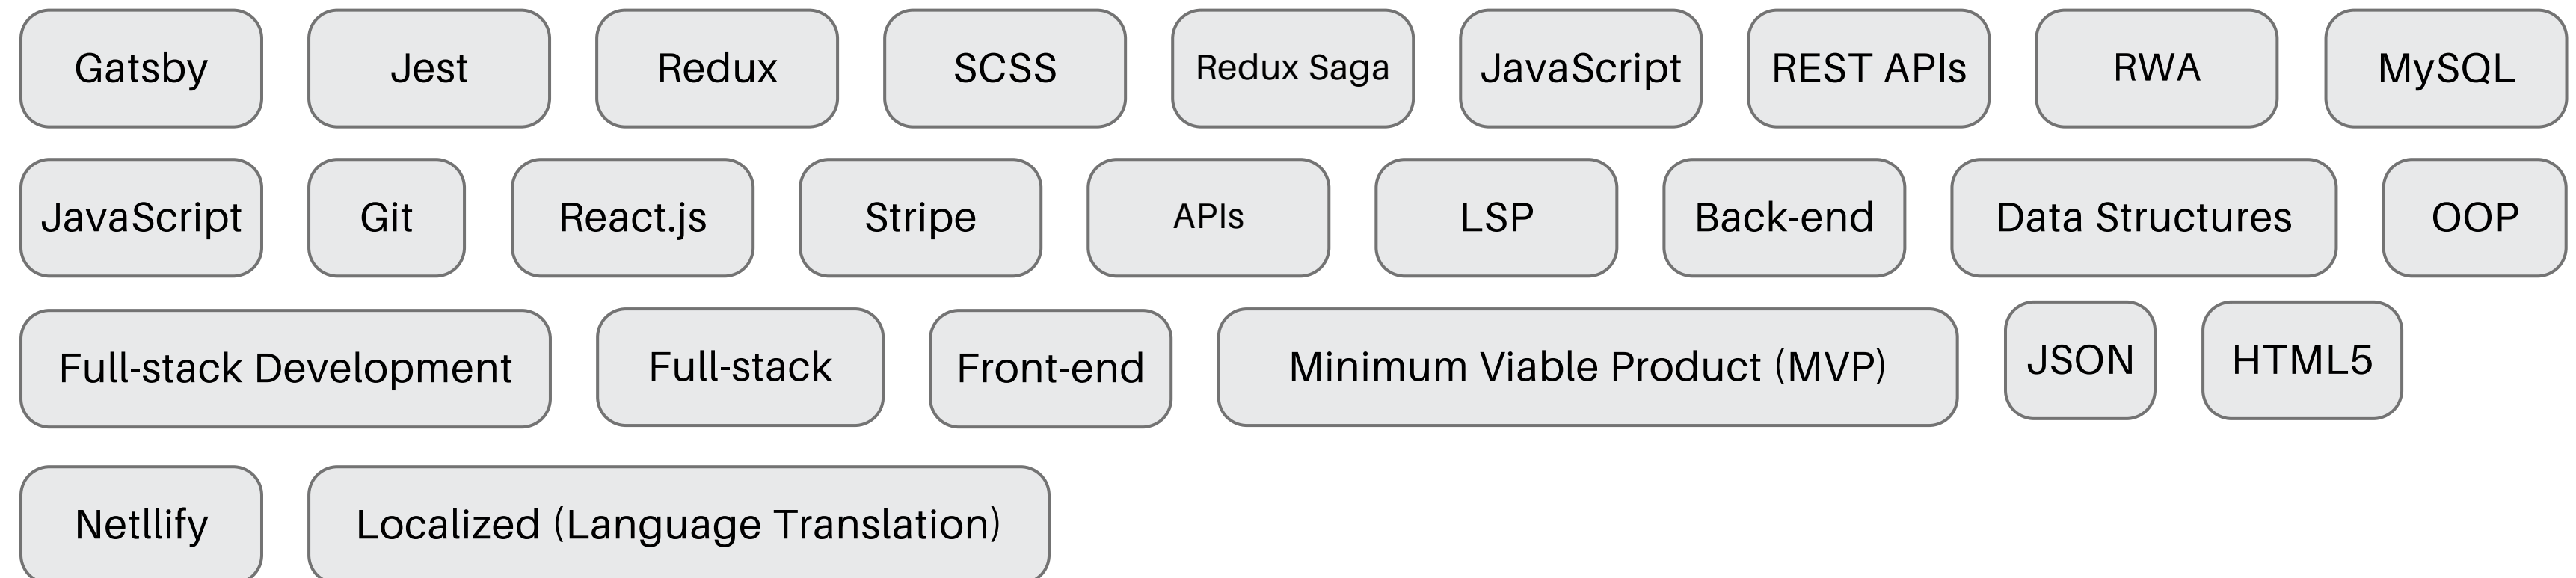

Skills & Tech-stack Used

TrustMeUp gives visibility to Charities around the world, of all kinds and categories, promoting their causes, we created the Platform from scratch with all the major features a charity platform should have, dashboard, multiple users, payment gateway integration.
